

Huatai No.10 Machine Put into Operation after Modification

On January 17th, 2016, Huatai No.10 machine put into operation after modification and successfully reeled paper in its first commissioning which marks Huatai Group made an important step in strategic transformation from newsprint production to cultural paper.

Huatai No.10 machine upgrading project with a total investment of RMB 200 million set up on July 25th, 2014, the project included comprehensive upgrading the original deinked pulp production line, adding sizing applicator and calendering equipment and organizing

technical modification team. Huatai Group cooperated with Voith, Andritz, GAW, ABB and other well-known papermaking equipment suppliers, and completed the installation for all new equipment and single machine debugging by the end of December.

The production line is able to produce high-grade offset paper, carbonless base paper, film coated base paper and other low basis weight products, realizes the income sales of RMB 750 million annually, realizes tax and profit of RMB 135 million and becomes a new profit growth point of Huatai Group. ▀
